HEAVY DUTY INDUSTRIAL FLOORING FROM THE JENNISON-WRIGHT CO. PROMOTES SAFETY AND PERFORMANCE

Jennison-Wright is committed to offering the highest quality, most reliable industrial flooring products resulting in customer value for the investment. We specialize in customer Service:

- Detailed Application Procedures • Estimating Assistance • Consulting Services

The Jennison-Wright Company has extended wood block flooring technology with two products that eliminate the hazards associated with creosote, solvent or other fuel oil-based chemical wood block treatments.

JENOIL® (W)RIGHT BLOCK Wood Flooring

New (W)RIGHT BLOCK™ flooring features a revolutionary, odorless treatment process developed specifically to address the stricter environmental requirements in today's industrial plants. Featuring the JENOIL® Solution, this new, environment wood block flooring is the most desirable alternative for in-plant flooring -- combining traditional performance, comfort, safety and cost savings.

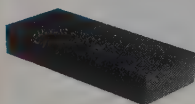

- Completely Odorless
- No Hazardous Chemicals
- 100% Non-Toxic Composition
- Resists Abrasion & Impact
- Reduces Maintenance Costs
- Controls Vibration & Noise
- Saves Energy

JURA BLOCK™ Polymer-Wood Flooring

JURA BLOCK™ construction makes blocks lightweight, resilient, abrasion-resistant and environmentally safe. In addition, the non-porous composition makes this flooring block resistant to moisture, oil and most chemicals. And unlike polymer-concrete blocks, these blocks will not chip or crack. Blocks lay up tight against each other to eliminate voids and future hammering of an open joint from rolling traffic.

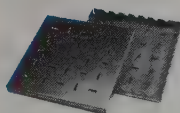

- Fiber & Plastic Resin
- No Treatment Necessary
- Less Waste & Shrinkage
- Superior Resiliency
- Stabilized Fiber
- Comforts Foot Traffic
- Better Performance

ALSO AVAILABLE FROM THE JENNISON-WRIGHT COMPANY

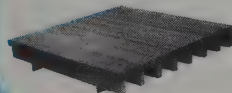

HEAVY-DUTY ASPHALT BLOCK

Jennison-Wright Asphalt blocks are composed of crushed rock, stone dust filler, and special asphalt cement, heated and compressed under a pressure of 2,400 psi. They are normally 5" or 6" X 12", and are made in thicknesses of 2", 2.5", and 3". They have been used in this country since approximately 1880, and continue to serve the purpose for which they were originally created...a phenomenon in today's world.

STELWOOD® STEEL TILE ANCHOR FLOOR PLATE

- Engineered to Extend the Life of New Concrete
- Eliminate Dry-Shake Toppings, Control Joints & Finish Troweling
- 11 Gauge Hot Rolled Steel, Anchors Securely in New Concrete
- Ideal Replacement Material, Particularly in Areas of Heavy Impact or Wear

STELWOOD® PRESS PIT MODULE

- Used in Press Room of Stamping Plants over Press Pits & Trenches
- Laminated, Pre-Finished hardwood on Welded Steel Base
- Increased Load-Bearing as Compared to "Current Standard" Pecan Panel

If you need intelligent answers about modular industrial flooring...
Wood Block, Stelwood® Press Pit Modules, Stelwood® Anchor Floor Plate or Heavy Duty Asphalt Block.

CALL US...WE HANDLE THEM ALL! INSTALLATION AVAILABLE.

All floorings, adhesives and sealers in stock for immediate shipment.

Jeppesen (Times Mirror Co.) (Airway Manuals, Training Program Design & Flight Planning), 55-T Inverness Dr. E., Englewood, CO 80112 (Brs. at Los Gatos, CA; London, England, Frankfurt & Hildesheim, Germany) (NR) (FAX: 303-784-4160; TELEX: 4322029)..... 303-799-9090

Among some of our many services:

- Design & Build Automated Machinery and Robot Cells
- Build Special Tooling, Fixtures, and Electrodes
- Field Installations/Modifications/Repairs
- Custom Software for PLC's, PC's, as well as implementing microprocessor products
- Rebuild/Recondition Machines
- Printed Circuit Board Repairs (PERTRON/Square D, Weltronic, Technitron and many others!)
- Product/Process Design/Consultations

We also Manufacture:

- Alpha Advanced Resistance Welding Control
- SenScope Data Acquisition System
- Induction Heaters
- Resistance Welding Electrode Dresser
- Single/Dual Head Welder
- High Energy Capacitive Discharge Welder
- Robotic Electrode Tip Dresser and MUCH more!

*Celebrating 30 years
of Service to Industry*

PULVERIZING SO EFFICIENT IT WILL RAISE YOUR STANDARDS.

No Contamination • No Temperature Rise

• Micron Master® Jet Pulverizer

1" Laboratory model to the 42" Production Mill, 4 designs, 11 mill sizes
Grind Friable Powders - Submicron to 10 Microns APS

Specializing in Heat-Sensitive or Abrasive Materials

• Chemical	• Pigment	• Agricultural	• Aerospace
• Plastic	• Paint	• Cosmetic	• Food
• Pharmaceutical	• Electronic	• Biological	

Advanced Liners: Ceramic, Rubber, Alumina, Tungsten Carbide, Teflon®

• Custom Grinding Division Submicron to 200 microns

Micron Master® Jet Pulverizer

Jet Milling with Ambient/Heated Oil-free Air/Nitrogen

Mechanical Milling • Cryogenic Services

Scrupulously Supervised

Particle size analysis: Coulter Counter, laser

Production Quantities

Satisfied customers worldwide are our top priority.

Call 1(800) 670-9695 for your pulverizing solution.

Strongest in the Magnetic Field!

Since our inception in the early sixties, Jobmaster has been committed to meeting the needs for quality magnets and magnetic products. We provide magnets and engineered components to thousands of national corporations, government agencies, and local companies specializing in aircraft and space development, construction, controls and automotive manufacturing.

Our policy is simple—to maintain our high quality standards and insure that each and every client is completely satisfied with our products.

- Rare Earth Magnets
- Ceramic Magnets
- Flexible Magnets
- Magnetic Assemblies
- Electromagnets
- Custom Designs
- Packaged Magnets
- Magnetic Separators

Some are better insulated against
the harsh environment of business.
Because they choose

Johns Manville.

INSULATIONS to control heat, cold and
sound in commercial, industrial and residential
buildings, pipes, ducts, and equipment

COMPLETE ROOFING SYSTEMS for commercial
and industrial buildings, including built-up,
modified bitumen and single ply membranes,
perlite, fiber glass and polyisocyanurate foam
(insulations), accessories, and guarantees

ENGINEERED PRODUCTS including concrete
slabs and floors for flooring and roofing substrates,
high efficiency air filtration media, fabrics and fibers
for reinforcement

As you can see, at Johns Manville we make insulation products for almost every conceivable application, as well as roofing systems, mats and reinforcements, and filtration media. But we don't see ourselves just as a supplier of products. We see ourselves as your partner.

Products that insulate, shelter and strengthen your bottom line.

At JM, we engineer our products for quality, of course, but also for your company's efficiency and productivity. Through research and development, we constantly seek ways to make your job easier, save you time, and save you money.

We can provide you with design support, installation training, inspection, and the most comprehensive guarantees available.

We value the safety of our employees and customers, the ethics of our business relationships, and the protection of our environment. And we believe that all these things combine to make the use of our products one of the smartest business decisions your company can make.

For more details, please contact our Product Information Center: 800-654-3103, fax 303-978-2318, or www.jm.com.

JOHNSON CONTROLS®

Controls Group

507 East Michigan Street
P.O. Box 423
Milwaukee, WI 53201
1-800-972-8040 ext. 135

**All Factories are
ISO 9000 Certified!**

The Controls Group of Johnson Controls is a world leader in the design, engineering, manufacture and installation of facility management and control systems and components for HVAC, energy, lighting, security and firesafety. It is also a leading manufacturer of pressure and temperature controls for original equipment manufacturers, wholesalers and distributors of heating, ventilating, air conditioning and refrigerating equipment.

Products Include:

- Metasys® Facility Management Systems
- HVAC Systems and Controls
- Direct Digital Controls
- Control Valves
- Dampers
- Actuators
- Sensors
- Temperature, Humidity & Pressure Controls
- Ignition Systems
- Thermocouples
- Vent Dampers

JORACO
INCORPORATED

Economical High Precision Presses

Joraco has been manufacturing high precision pneumatic presses for fifty years and selling them direct to customers at tremendous savings. Since their introduction in 1964 the TOGGLE-AIRE line of powerful toggle-action pneumatic presses has been meeting needs in a wide range of application areas. Joraco is known for its engineering expertise, fast, responsive service and guaranteed reliability.

Today Joraco supplies over 15 models in sizes from 1/2 ton to ten ton for both single stroke and automated operation. Customizing services are also available to alter presses for specific requirements.

Joraco presses are used by many of the nation's most recognized companies in industries covering:

- Metal working
- Aerospace
- Electronics
- Optical
- Electrical
- Automotive
- Jewelry
- Instrumentation
- Toys and Sporting Goods
- Musical Instruments

See our product line in the catalog file.

K-Tron America

First in Material Handling Technology
 Visit us at <http://www.ktron.com>

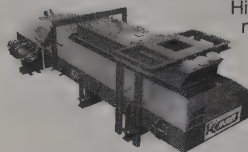

Modular Volumetric and Gravimetric Feeders

High accuracy. High performance. High value. For feeding bulk solids from 0.1 lb/hr to 220,000 lb/hr. Stainless steel construction. Continuous or batch processes. Able to solve bridging, ratholing, and other material handling problems.

Heavy Duty Weigh Belt Feeders and Belt Scales

High accuracy weigh belts, belt scales and mass flowmeters. Single units to complete systems. Heavy duty models for cement, gypsum and rock products. Feed rates from 1,000 lb/hr to 1,000 tons/hr.

Filterless Vacuum Loaders for Powders and Pellets

Patented dual cyclone Hurricane design handles a wide range of materials without the bulky filter required by most vacuum conveyors. For dusty powders, add a compact 1 micron filter.

KICKHAEFER MANUFACTURING COMPANY

- ISO 9002/QS 9000 Certified
- Design & Engineering Assistance
- Flexibility in Manufacturing Die Building
- CAD Equipped Engineering Center for IGES Transfer
- Production Part Approval Process
- 180,000 Sq. Ft. Manufacturing Facility

Laser/Laser Presses

Precision Laser Cutting Combined with high speed punching.

- Stamping-like Quality Without Expensive Tooling
- Superior Edge Quality
- Minimum Production Lead Time
- Repeatability. Part to Part.

Part Sizes

- Carbon Steel to .50 in
- Thermoplastic Composites to .50 in
- Stainless Steel to .25 in
- Non-ferrous Material to .25 in
- Sheet Size: 96 in x 63 in Max

Fourslide/Multi-slide/Vertical Forming

- Ribbon Parts Produced From Stock Tooling
- Welding, Tapping, Chamfering, Stitching in Primary Operations

Part Sizes

- Feed Length to 15.0 in, Width to 3.75 in
- Thickness to .120 in, Wire Diameter to .250 in

Punch Press

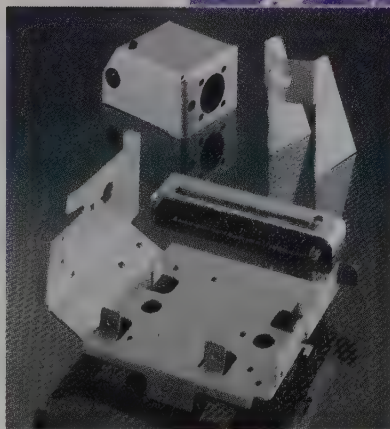

- 20 to 300 Tons
- High Speed Hydraulic Presses
- Short & Long Runs
- 60 Ton Bruderer High Speed Press

Part Sizes

- Infinite Feed Length, Width to 24.0 in, Thickness to .28 in

Standard Product Lines

Clips, Clamps (Plain & Vinyl Coated) Expansion Plugs & Brackets.

Kickhaefer Mfg. Co.
ISO 9002
QS 9000
File #A 5831

KMC Stampings

- Fourslide: Nilson S2F, S3F
- Multi-slide: Baird 00, 28, 33, 35
- Vertical Forming: Nilson 1100, Finzer 360
- Punch Press to 300 Tons
- In-Machine Welding & Tapping
- Baird 3-24

KMC LaserForm

- Laser Press: 2200 watt Trumpf 600 L
- Laser Fabricating System: Multiple 2600 watt Trumpf L2503E LaserCat®
- CNC 6-Axis Forming Center
- Numerex CMM #2840

Our extensive machinery allows us to produce custom stampings and metal fabrications in both prototype and production quantities.

Exceeding Customer Expectations Since 1908

1219 South Park Street • P.O. Box 348 • Port Washington, WI 53074-0348 • Phone: 800-615-6656 • Fax: 262-284-9774

and on the Internet

KMI SYSTEMS, INC.

Designers,
manufacturers,
installers and
system servers:

- Washers
- Picklers
- Dry Off Ovens
- Curing Ovens
- Wet Spray Booths
- Powder Systems
- Flow Coat
- E-Coat
- Porcelain Furnaces

- Environmental Control Systems
- Complete Conveyor Systems: Fixture & Overhead Monorail

Product service capabilities and follow-up replacement part suppliers.

Proven Turnkey Capabilities:

- Design Engineering
- Fabrication
- Installation
- Testing & Development
- Field Services

Call TODAY to begin KMI's complementary engineering feasibility analysis in your plant or offices:

LIQUID LEVEL SENSING PRODUCTS FOR INDUSTRIAL, MARINE, AND THE O.E.M. CUSTOMERS

30 Plus Years of experience in liquid level sensing providing a wide
array of quality products at competitive prices.
"KSR Kuebler deals with liquids."

- Magnetic Sight Glasses and Accessories
- In Tank Type 4-20mA Level Transmitters
- External Chamber Level Transmitters
- Side Mounted Level Switches
- Top Mounted Level Switches
- External Chamber Level Switches
- Display and Control Units
- Flood Level Switches
- Marine Level Sensing (shipping & offshore)
- Magnetic Proximity Switches
- Explosion Proof & Intrinsically Safe

Low cost OEM type products to ANSI 2500#
pressure class. Stainless steel, Teflon or
Titanium construction (to name a few).
From -250°F to over +800°F, KSR Kuebler has
solutions to your demanding liquid level sensing
problems. Call 1-800-338-6310 We're on Your

email: kaswitch@aol.com

www.kaswitch.thomasregister.com

KA Switch specializes in the design and manufacture of high current switches and flexible jumpers. Emphasis is on custom designed applications. The KA Switch module design has been used for more than 30 years on fixed installation with currents as high as 500,000 ampere and on portable switches, both air cooled and water cooled, for currents as high as 75,000 ampere. The KA Switch module has many diverse applications including electrochemical process, refinery and plating operations, rectifier bypass operations, etc. and can easily be adapted to replace other existing high current switches. Over the years the KA Switch modules have acquired an enviable reputation of reliable performance. KA Switch is committed to providing a quality product and has achieved registration to ISO 9001.

Every Time You Need A Lift! Kalmar AC, Inc.

Kalmar AC is a full service company offering a variety of lift trucks, services, support and lift truck parts. Kalmar AC's main headquarters is located in Dublin, Ohio while factory stores are located in Atlanta, Georgia, Chicago, Illinois and Oakland, California.

Kalmar AC dealers can be found in over 100 locations throughout the United States, Canada and Mexico. They are well trained and committed to serving the customer and many of them have been Kalmar AC dealers for well over a decade.

To follow is a brief outline of the products and services that Kalmar AC offers:

Lift Trucks - Kalmar AC offers a wide variety of forklift trucks ranging from 2,000 to 16,000 lb. capacities. The entire Kalmar AC product line is made up of over 50 different models. The product line includes electric, diesel, gas and LPG powered units. Both cushion and pneumatic tire I.C. units are available along with narrow aisle units and a variety of walkie models. The variety of models and the quality of the Kalmar AC product offering has everything it

takes to meet the material handling requirements of the customer, whatever they may be.

Lift Truck Parts - There is no substitution for genuine Kalmar AC replacement parts. A computerized distribution center provides dealers with access to over 120,000 different parts for all Kalmar AC products. And, Kalmar AC is the source for **genuine Allis-Chalmers parts**.

Service - Kalmar AC's nationwide network of over 100 locations provides customers with fast, professional service support. Comprehensive service programs range from on-site preventive maintenance to extensive rebuild programs.

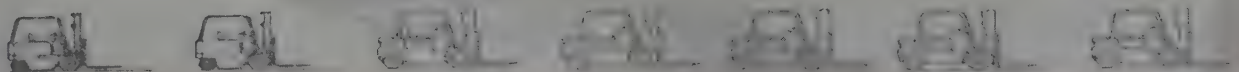

Kalmar AC dealers have a variety of programs that make responding to customer needs and maintaining accurate records on their customer's equipment quicker and more efficient. The software program K-Source allows the dealer to immediately cross reference over 60,000 competitive part numbers to current Kalmar AC numbers.

Product Support Staff - Kalmar AC's highly knowledgeable product support staff is available to help solve material handling problems and answer questions. In addition, this group of people continuously evaluate equipment performance and are involved in making the updates and advances needed to maintain Kalmar AC's quality standards for lift truck performance and design.

Commitment and Experience - The friendly, knowledgeable staff at Kalmar AC is available and ready to help. Every person on the Kalmar AC team has many years of experience in the material handling industry and they are committed to making each customer's experience with Kalmar AC productive and pleasant. To find the Kalmar AC dealer in your area, please contact Kalmar AC at (800) 311-8452.

WE MOVE THE WORLD..... KART-A-BAG®, DIVISION OF REMIN®

AMERICAN MANUFACTURED SINCE 1967

Since 1967, *Kart-a-Bag®* products have been manufactured completely in the U.S. Considered the premier quality of telescoping carts and hand trucks carrying 100-700 lbs., only top quality American manufactured steel, aluminum, ABS plastic and wheels are used, causing *Kart-a-Bag®* to have a 1/2% per year repair rate on all products manufactured.

This consistently high quality of product gives *Kart-a-Bag®* an impeccable, 30 year track record. Carts requiring repair are dealt with in a one day turn around at the manufacturing site, at the Western warehouse and at numerous international distributors sites. *Kart-a-Bag®* is very proud of its outstanding products, on its courteous responses to all requests for information and repair and rapid repairs made on 10-14 year old units. **You don't throw away a *Kart-a-Bag®*, it just keeps rolling and rolling and rolling.....**

The company has patented and manufactures 18 cart designs, a variety of recessed telescoping handles and wheel components, and a variety of cases in which to store carts when they are not in use.

RAVE REVIEWS - DESIGN PRIZES - INNOVATIVE DESIGN

Kart-a-Bag® has received rave reviews in numerous periodicals in the many markets for which they manufacture. (Please see page on web site: www.kart-a-bag.com) In 1995, the newly designed Kartmaster HD500S received one of 10 "Pick of the Show" design awards at the NAB trade show from Video Systems magazine for outstanding design. These 10 awards were chosen from over 5,000 companies exhibiting at that trade show.

EASE OF USE:

The newly patented push button release system makes the opening and closing of carts quick and easy. And the exclusive bungee cord design provides a new solution for side slipping of heavy cart loads.

FOR THE FINEST QUALITY PRODUCTS AND COURTEOUS SERVICE SINCE 1967

PRESSURE IS OUR BUSINESS!

@Kavlico...we have the technology that fits™

- Low Cost
- High Accuracy
- Current and Voltage Outputs
- Small, Lightweight
- OEM and Application Specific Designs and Quantities
- Off-The-Shelf Designs
- Excellent Long Term Stability and Reliability
- Automotive, Industrial, and Aerospace Applications

KAYDON Performance

Separation Technology for the New Millennium

Power Generation
Pulp & Paper
Marine
Steel Production
Metalworking
Mining
Construction
Gasoline Distribution
Military Jet Fuel Distribution
Military Land Vehicle On-board Fuel Filtration
Refrigerant Filtration Separation

Kaydon Custom Filtration Division designs & builds industrial oil and fuel filtration equipment for markets such as Power Generation, Military Fuel Handling, Pulp & Paper, Steel, Marine, Mining, Cryogenic/Refrigerant, Fluid Power, and Machine Tool. Kaydon specializes in removing harmful water from lube oil with expertise in turbine oil conditioning for small industrial steam turbines. Kaydon has an R&D department with engineering experience in designing custom filtration products to meet specific needs. Kaydon also produces a line of flow control devices that indicate and control fluid flow of petroleum based or aqueous fluids to critical equipment. Kaydon Custom Filtration has plants in two locations, LaGrange, GA and Greenville, TN. Kaydon is an ISO 9001 Registered Company.

SERVING INDUSTRY SINCE 1958—NOW FROM TWO PLANT LOCATIONS—ISO 9002 & QS-9000 Certified

PRINCIPAL PRODUCTS:

Manufacturers of four-slide wire forms, stampings, flat forms, flat springs.

- Wire Brackets
- Automotive Clips
- Cable Clips
- Fuse Clips
- Molding Clips
- Spring Clips
- Wire Clips
- Electrical Contacts
- Flat Springs
- Wire Handles
- Wire Hooks
- Wire Shapes
- Brass & Copper Pins
- Cotter Pins
- Bearing Sleeves
- Shaft Sleeves
- Shaft Sleeves
- Steel Sleeves
- Split Sleeves
- Bushings
- Metal Spacers
- Tube Spacers
- Multi-Slide Stampings

*See our ad under "STAMPINGS: MULTI-SLIDE®" in the PRODUCT/SERVICES VOLUMES. **See our ad under "WIRE GOODS, SPECIALTIES SPECIAL SHAPES, FORMS, ETC." in the PRODUCTS/SERVICES Vol.

KEMAC

HotJet Spray Washers Eliminate the Expense
and Hazards of Solvent-Based Cleaning

*Kemac HotJet Spray Washers are the people-
friendly and cost-effective alternative to
mineral solvent-based cleaning systems.*

*Now, you can eliminate the
odor and mess of solvent
cleaning and avoid
the potential
health hazards of
handling toxic liquids.*

The Kemac single and multi-stage product line includes
standard and engineered units designed to meet your
individual cleaning requirements. Models include cabinets,
top-loaders, vertical doors, conveyors, tumblers, ultrasonics,
and carousels.

**Call the Kemac Corporate Headquarters to Locate a
Distributor Near You!**

THE SOLDER CONNECTION

The Soldering Technology Experts

Throughout the world, Kester products are known for their high quality and advanced technology. Kester has been helping manufacturers solve their toughest production problems with our sophisticated soldering materials, chemical formulations and application methods. In addition, we have a full staff of technical support on hand to aid you in any solder application.

In today's challenging marketplace, Kester is dedicated to advancing solder technology. With our expertise and track record, we have been a driving force in moving the electronics industry toward safer and more environmentally friendly manufacturing processes.

Contact Kester—The Soldering Technology Experts. See our ad under "Solder and Chemical Manufacturers."

Forward thinking.

When food safety and quality are at stake, *forward thinking* is the only kind worth doing.

- **Specialized Conveying Systems** to move food processing forward efficiently – from the people who thought up the 10,000 **Iso-Flo®** systems around the globe.
- **Automated Inspection Systems** from the people who thought up **Tegra®**, for sorting by color, size and shape ... at rates up to a million objects a minute.
- **Processing & Preparation Systems** from the people who thought up **Turbo-Flo®**, blanching, steaming and cooking within a compact footprint.

Key Transducers, Inc.

KEY TO YOUR MEASUREMENT NEEDS

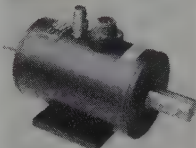

Since 1986, Key Transducers, Inc. has been serving a wide variety of industries with high quality precision strain gage based torque and force transducers. Complete product line includes rotary transformer, slip ring, and reaction torque transducers as well as general purpose, fatigue rated, and multi-axis load cells.

Fatigue Rated
Load Cell

Torque/Thrust
Transducer

Rotary Transformer
Torque Sensor

Key Transducers, Inc., also supplies repair and calibration services on torque sensors and load cells. Calibration Facility Conforms to ISO/IEC Guide 25-1990 and ANSI/ NCSL Z540-1-1994, Accredited by A2LA.

(See adv. page 2247)

(KEYTECH INC.—Continued next page)

Our unique ThermoStatic Printing Process™ creates graphics that stay sharp and vibrant with repeated use – they're actually capable of outlasting the product itself!

That's because they penetrate deep beneath the surface to become an integral part of your product.

Even detailed photographic-process printing is easily achieved and exactly reproduced. You get continuous-tone, precisely registered images printed at our place or yours. Our process is safe too, using non-toxic dyes meeting EPA regulations. Say goodbye to the quickly deteriorating results of alternative methods.

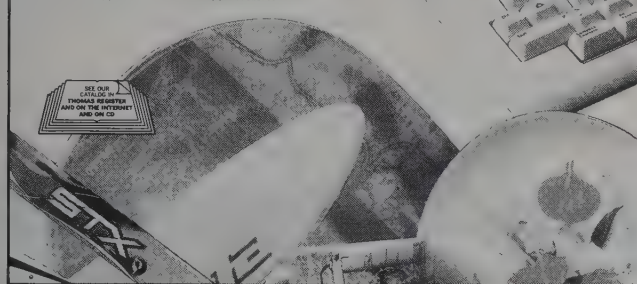

Image sells. To add enduring visual appeal and value to your products, and enhance your brand, you now know where to look.

KINEMATICS & CONTROLS CORPORATION

15151 Technology Drive • Brooksville, FL 34609

Phone: 352-796-0300 • Toll Free: 800-833-8103

Fax: 352-796-4477 • EMail: kinematics@earthlink.net

<http://www.kinematics.thomasregister.com>

• Sensors & Controls

Standard & custom built liquid level sensors, level switches & controls for industrial, sanitary and military applications. Technologies include optoelectronic, fiber optic, conductivity, thermistor & magnetic float types.

• Filling Machinery

Fully automatic, precision filling stations, & low-cost, manual fillers for powdered or granular materials. Doses of from 50 mg. to 150 gm. Production rates of 15-60 fills/min. Repeat accuracy of $\pm 1.0\%$ typical. Perfect for foods & pharmaceutical substances. Explosion-Proof models for Class II, Div. 1 applications.

Kinetic Ceramics, Inc.
Pioneers in Piezoelectric Technology

KINETIC CERAMICS, INC., 26242 Industrial Blvd., Hayward, CA 94545 (NR).....800—806-6016
(FAX: 510-264-2159; E-Mail: piezo1@kineticceramics.com; <http://www.kineticceramics.com>; Or Call: 510-264-2140)
(Mfrs. Of Piezoelectric Actuators, Sensors & Electromechanical Devices Incorporating Them. Specializes In High Displacement & Force Combined With Submicron Precision. Engineer Devices To Customer Requirement For Optics, Metrology, Fast Valves, Fuel Injection, Metering Pumps, Industrial Process Control & Ultra Precision Machining. Makes Associated Power Supply & Control Systems. Sensors Include Accelerometers & Load, Force & Pressure Transducers. Designs & Manufactures Electronic Safe & Arm Units & Electronic Fuzes. Formulates & Produces Its Own Proprietary Ferroelectric Ceramics)
(Pres.) James H. Banister, Jr.; (Eng. Mgr.) C. O'Neill

Kinetic Co., Inc. (Perforating Blades, Knives, Slitters), 6775-T W. Loomis Rd., P.O. Box 200, Greendale, WI 53129-0200 (Ex., Ca. 'Masters-Milwaukee') (NR) (FAX: 414-425-7927; TELEX: 26-9541).....414—425-8221

(Mfrs. Of A Complete Line Of Flowmeters, Rotameters & Custom Instruments. Glass, Plastic & Metal Tube Models. Capacities From .37cc/mn To 200 GPM Water & 37cc/mn To 350 SCFM Air For Standard Meters. Bypass Meters To 20" Pipe Size. Scale Lengths 2" To 10". All Plastic Construction Standard For Some Models. In Line & Panel Mount Styles. Valves Optional On Many Models. Alarms Or 4-20 mA Output Optional For Some Models. In-House Certified Calibrations)

Performance.

King flowmeters perform exceptionally well in a wide range of industrial, commercial and specialty applications. That's because we manufacture eleven different groups of products with enough sizes, styles and materials of construction to satisfy almost any rotameter requirement. That's how King performance works for you.

Next time you need a variable area flowmeter, basic or with all the options, call the factory. Or visit us at our website.

KOHLER POWER SYSTEMS

THE DEPENDABLE CHOICE

For over 75 years Kohler Company has been recognized as a leader in the electrical generating industry. From the first automatic genset to the sophisticated microcomputer-controlled systems manufactured today, Kohler's full line of standby and prime power generator sets, transfer switches and switchgear help facilities of every size manage electrical requirements. Kohler offers generator sets from 6 kW to 2000 kW, transfer switches from 30 to 4000 amperes and switchgear built to customer specifications. All gensets are available in 50 or 60 Hertz in numerous voltage combinations. Kohler also manufactures a full line of generator sets for mobile, RV, and marine applications, and gensets for farm, construction and recreational use. Kohler's product line continues to expand with the new 2000 kW, 480 volt generator set, as well as more factory direct accessories.

Controllers are available for every application and provide full monitoring information. From basic monitoring devices to microcomputer controls, KOHLER controllers provide the degree of accuracy and programmability for every situation. Available in four standard configurations, the full line of KOHLER controllers may also be accessorized for more specific needs. And with Kohler's expanded distribution network, quality and coverage continue to grow.

POWERBOOST™ 6 kW - 18 kW

Gas, gasoline and diesel-fueled models are available from 6 kW to 18 kW. PowerBoost units are available with a brushless design as well as direct excitation in three phase and single phase models. All gensets are equipped with the KOHLER solid state PowerBoost regulator for voltage regulation within $\pm 2\%$.

Kohler's new Decision-Maker™ 340 satisfies the need for advanced control in today's standby power system.

FAST-RESPONSE™ 20 kW - 300 kW

One of the most advanced generator lines available, the KOHLER Fast-Response series, is well known for its exceptional motor starting performance and voltage recovery - ten times faster than many competitive generator sets of equal rating.

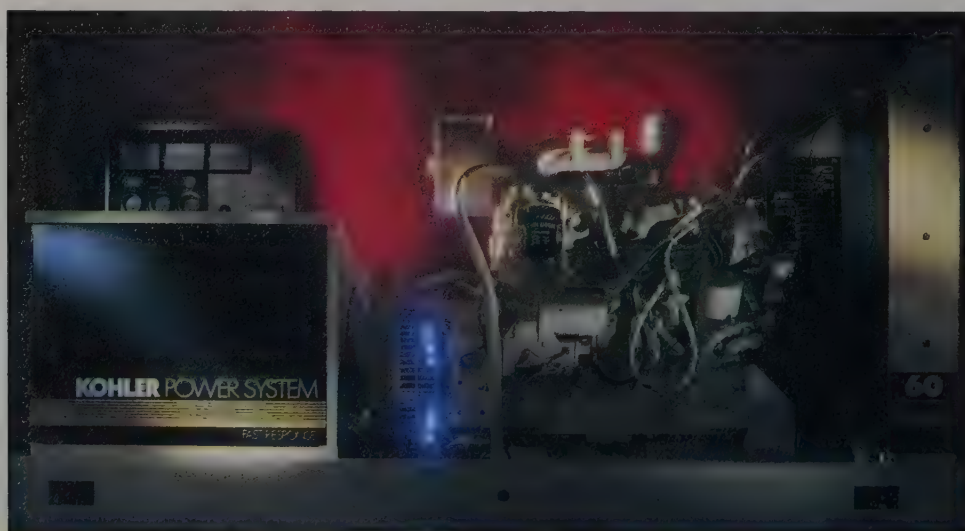

Kohler designs switchgear for the domestic and non-domestic marketplace. Series ISAK automatic paralleling switchgear provides the most economical method of operating up to six Kohler generator sets in parallel.

With FR™ Series generator sets, even 50% load changes are virtually imperceptible. FR series gensets recover from voltage changes within 0.05 seconds—before the voltage dip or surge can reach full value. It's the reason FR gensets have better motor starting ability than competitive models. The KOHLER microcomputer Decision-Maker™ controller executes instructions in microseconds and is virtually immune to false input signals.

TRII-SERIES™ 350 kW - 2000 kW

The TRII-Series™ now includes a powerful 2.0 megawatt generator set. Like other TR models, these units are available with your choice of cooling and exhaust system options. All TR gensets may be equipped with the KOHLER microcomputer Decision-Maker™ controller for full monitoring instrumentation, as well as automatic protection features and a broad range of accessories. Brushless generator design and permanent magnet pilot exciters provide greater reliability and minimal maintenance. These features make the TRII-Series ideal for larger scale emergency/standby power applications, interruptible rate and prime power applications. With isochronous governors as standard equipment, steady-state frequency regulation from no load to full load is $\pm 0.25\%$.

POWER ON DEMAND

To complement the KOHLER broad generator set selection is one of the largest transfer switch lines in the industry. Choose from a variety of transfer switches with the flexibility to match any marketplace requirement.

DOMESTIC

For domestic applications, Kohler can supply UL 1008-listed ATS using power switching mechanisms that transfer to the emergency source in under 1/6 second. Additionally, programmed transition mechanisms are available. Programmed transition places the contactor in an off state with neither source connected for an adjustable period of time. UL Listing requires that the transfer switch pass stringent tests such as amperage withstand, overload, and load/life designed specifically for transfer switch applications. All system voltages are supported and transfer switches are available in amperage sizes ranging from 30 amps thru 4000 amps, two, three, or four poles. Switch styles are automatic, non-automatic, manual, and bypass isolation.

INTERNATIONAL

Kohler also manufactures a complete line of transfer switches for the non-domestic marketplace. International applications rely on IEC Standards and normally utilize other than UL-rated devices. Circuit breaker style mechanisms, both with overload protection and without overload protection, 40 to 4000 amps, three and four poles are available.

CONTROLS

Both domestic and international automatic transfer switches utilize either solid state electronic logic or microprocessor-based intelligence circuits. The solid state logic system performs source monitoring, transfer system timing and diagnostics. A comprehensive set of accessories completes the solid state logic system.

Microprocessor-based logic provides unexcelled control of the transfer switch. Both normal and emergency sources are monitored and set points are programmable by a key-protected tactile keypad. Timing is precise and can be set to 99 minutes in one-second increments. System records including source history are available.

Optionally, the microprocessor-based control can be monitored and controlled by personal computer software developed by Kohler. Utilizing the system's communication capabilities, automatic transfer switches can be networked and can be monitored over telephone lines.

Superior Productivity Solutions

Precision CNC Machine Tools

- Vertical and horizontal metalworking machining centers
- Multiple spindle, high-speed routers and boring machines for woodworking, plastics and composites

Factory Automation Special Machines

- Fully integrated CAD, CAM, CAPP environments
- 150,000 sq. ft. assembly plant
- Integrated MRP, JIT facility
- Precision large part CNC machining facilities
- Electrical & electronic design & assembly
- State-of-the-art laser calibration and inspection
- Machine and factory control integration and interfacing
- Certified MIL-I-45208A quality control/inspection program

THE LEADER IN SEPARATION TECHNOLOGY

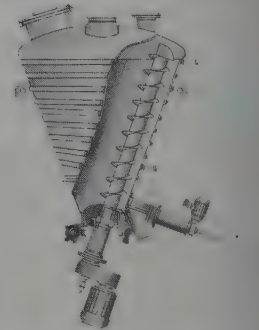

CENTRIFUGES -

Pusher, peeler, vertical
basket and Flottweg
Decanter® centrifuges

DRYERS -

Plate dryers,
mixer dryers and Binder
fluid dryers

TESTING FACILITIES -

We can duplicate your
process in our fully-
equipped testing facilities
to ensure the optimum
processing solution for you.

KRUEGER BEARINGS, INC.

Distributor of

- Adjustable Speed Drives
- Bearings
- Belting and Belt Fasteners
- Bushings: Brass, Bronze and Copper
- Casters and Wheels
- Chain
- Conveyors, Conveyor Belt and Pulleys
- Couplings
- Filters
- Gear Reducers
- Motors
- Pressure Switches
- Sheaves and Variable Speed Sheaves
- Solenoid Valves
- Sprockets
- Specialty Conveyor Belts

Manufacturer of Babbitt Lined Bearings

- Steel, Bronze or Cast Iron Backed
- Solid or Split
- Anti-Whirl Designs
- Flat or Taper Land Designs
- Tapered Lands in the Bore or on the Faces
- Shoe & Thrust Type Assemblies
- Spherical Designs
- Elliptical Designs
- Insulated

Innovation in combustion control

Kromschroder is a leading manufacturer of quality components and systems for the measurement and control of fuel gases and industrial burners.

Kromschroder's full line of combustion equipment can fill all your needs for control valves, regulators, pre-packaged gas trains, burners, flame management and relay or PLC based control panels.

Because of our position as a global supplier, Kromschroder can supply components in national or metric pipe threads, multi-lingual manuals and instructions and engineering drawings done to American or European standards.

Kromschroder's high quality designs reduce space requirements as well as reduce installation and maintenance costs.

Kromschroder provides a total lower cost over the life of your system.

Gauges That Really Measure Up! Available In Stainless Steel

Accurate, Dependable DIRECT & REMOTE
Reading Gauges

- Fuel Oil & Space Heater Tanks
- Small Engine Tanks
- Industrial, Chemical Gasoline Tank Applications
- Custom Design Gauges for Special Applications
- Heavy-duty construction. Simple, dependable design. Easy "At-A-Glance" reading.

Service...The Measure Of Our Success

We set the service standard others measure up to.

- Immediate Shipment (emergencies accommodated)
- Absolute Satisfaction Guaranteed
- No Minimum Order

INDUSTRIAL
COATINGS

Your One Source For Industrial Paints and Coatings

Call 800-925-3434

for free product information and your nearest distributor

Krylon® leads the way with a tough army of protection. Choose from our full line of industrial-strength paints, like Rust Tough®, the advanced rust prevention system. And now, combined with Sprayon®, Martin Senour®, White Lightning® caulks, Tri-Flow® lubricants and Cello® cleaners, the leader in aerosol chemicals, all of your industrial maintenance problems are solved.

Krylon ... The #1 Brand of Spray Paints

Sherwin-Williams Consumer Group • Cleveland, Ohio • www.krylonindustrial.com

INTERIOR / EXTERIOR LACQUERS

- General Purpose Maintenance
- Over 70 Colors
- Primers

TOUGH COAT™ ACRYLIC ENAMELS

- High Solids Formulation
- Maximum Coverage
- High Gloss with No Peeling and Chipping

RUST TOUGH™ RUST PREVENTIVE ACRYLIC ENAMELS

- Alkyd and Water Based Formulas
- For Primed and Unprimed Metal
- One Coat Coverage
- Fast Dry Time

QUIK MARK™ UPSIDE DOWN™ MARKING PAINTS:

- Solvent -Based Marking Paints
- Water-Based Marking Paints
- APWA Solvent-Based Marking Chalks
- 16oz. & 20oz. Cans

STRIPING PAINTS

- Water-Based Striping Paints
- Solvent-Based Striping Paints

FEATURING:

- EZ Touch™ Fan Spray® Valve
- Bulk Paints Available

STATE-OF-THE-ART AUTOMATED SYSTEMS

Let Us Turn Your Equipment Problems Into Profits!

At Kuntz; the latest in automation technology is brought to an impressive reality.

We are a single source special machine builder where innovation, quality workmanship and superior components separate us from the pack since 1969.

PARTIAL LIST

OF INDUSTRIES SERVED:

- Aerospace
- Automotive
- Consumer Goods
- Electronics
- Food and Pharmaceutical
- Hardware
- Medical
- Sporting Goods

GENERAL APPLICATIONS:

- Accumulation/Collation/Upstacking
- Assembly
- Bonding - RF/UV/Ultrasonic/Adhesive/Heat Staking
- Bundling
- Die Cutting and Handling
- Dispensing or Filling
- Packaging and Marking
- Parts Handling
- Special Process
- Testing / Leak/Vision/Gauging and Continuity
- Washing/Soaking/Flushing
- Many Others - Please Inquire

MACHINE CONCEPTS

PERFORMED:

- Carousel
- Flexible Conveyor Systems
- Inline
- Over/Under
- Process Trains
- Robotics
- Rotary
- Transfer
- Walking Beam
- Work Cells

MACHINE TYPES:

- Cam Driven
- Dispensing including Continuous Line Striping
- Flexible or Dedicated
- Hydrophilic Coating/Drying/UV Curing
- Intermittent on Demand
- Intermittent or Continuous Motion
- Liquid Silicone Injection Molding
- Non Synchronous
- Palletized
- Pneumatically or Hydraulically Driven
- Robotized
- Servo Driven
- Web Handling/Converting/Laminating

KUSS

Pioneering

State-of-the-Art

Advancement

in Filtration

Technology for

Over 45 Years.

Count on KUSS for:**Quality**

We serve both OEM and aftermarket needs with quality that sets the standard. Our full range of filters for fuel systems, windshield washers, air conditioning and other applications have earned us countless awards for product excellence. Ford's Q1, Chrysler's QE and GM's Targets of Excellence awards are examples.

Engineering

Our team works with fully integrated CAD programming and hardware to turn your product ideas into complete working drawings.

**Technology**

We're experts at insert molding and ultrasonically sealing thermoplastics with a variety of filtration media.

Service

We're customer driven and our people speak your language with a complete knowledge of today's materials and specifications.

Testing Service

We provide comprehensive on-premise capabilities for media analysis, filter performance testing and total system evaluation. Our program provides for absolute confidentiality.

Display System Solutions

Whether your operational need is airborne, shipboard, submarine, or ground-based...

L-3 Communications can provide the "total display system solution." For over 20 years, L-3 Communications has been delivering rugged, reliable, high-performance display systems for demanding military applications. Our performance-proven displays are available in a wide range of sizes (5"x5" to 21.3") to meet a multitude of system architectures, and are available as COTS. Rugged, Full Mil or customized solutions.

The L-3 Advantage...

Standard Products with the Flexibility to Customize
Speed in Product Development and Delivery
Specialist Expertise and Over 20 Years of Experience
Superior Supply Chain Partnerships
Off the Shelf Low Risk

Quality Manufacturing Outsourcing

The Benefits of L-3's Manufacturing

Printed Circuit Board Assembly
System Assembly
Build-To-Print Services
Prototype Manufacturing
Depot Repairs
Upgrades/Enhancements

L-3 designs and manufactures a variety of low and high complexity products covering a broad customer base.

Meeting ISO 9001 standards...L-3 offers complete turn-key systems including procurement, materials management, quality and test support for all products.

ISOLATION/BARRIER TECHNOLOGY

La Calhène offers a complete line of standard and custom designed flexible and rigid wall isolation (enclosure) systems designed to operate under positive or negative pressure, turbulent or laminar aerobic (nitrogen, carbon dioxide, etc.) conditions.

- **DPTE TRANSFER SYSTEM** (Double Door, Rapid Transfer Port)
- **DPTE** (Double Door) **TRANSFER CONTAINERS**
- **HALF-SUIT, GLOVE MANIPULATION**
- **PASSPORT RAPID TRANSFER SYSTEM** (Electronic-pneumatic, linear locking)

Our Dexon Manufacturing Division offers standard or custom Dexon laminar flow ultra clean air portable clean rooms, modules, vertical and horizontal workstations. Also custom laminar flow units for Q.E.M.

Laboratory Furniture & Equipment

For industrial labs, hospitals and schools

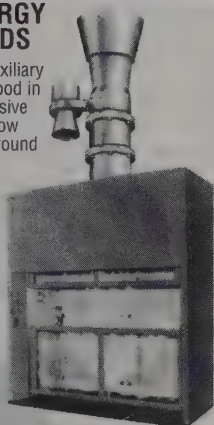

REVOLUTIONARY NEW 90% ENERGY SAVER LABORATORY FUME HOODS

Not only does the industry's highest performing auxiliary air fume hood—the only 90% Energy Saver hood in the industry—drastically reduce wasted and expensive heated and air-conditioned air, but it also forms a low velocity curtain of auxiliary air evenly distributed around the perimeter of the hood face.

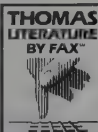

This curtain of auxiliary air mingles with 25-30% of the conditioned room air and sweeps the fumes and vapors to the rear exhaust slots of the hood, preventing any of the fumes and vapors from reaching the breathing zone of the lab personnel

The fact that lab fabricators' Energy saver safety fume hood out performs other hoods has been documented by an independent testing agency.

- Laboratory Tables
- Service Fixtures
- Floor Cabinets
- Sink Assemblies
- Modular Wall Cabinets
- Counter Tops Available in Cast Epoxy Resin, Plastic Resin & Solid Bond Stainless Steel

Available in Lengths from 3 ft. to 100 ft.

For Uncompromising Caster Quality & Performance, Use Modern Suspension Systems' Shock Absorbing Casters

- Modern casters, with built-in shock absorption, are the leaders in:
- **Engineered Performance:** with load capacities of 50 to 50,000 pounds.
 - **Shock Prevention:** absorbing up to 80% of shock and vibration.
 - **Multiple Protection:** wheel wear and floor damage minimized.
 - **Noise Reduction:** as much as 75%!

**Modern Suspension
Systems**

Lapeyre Stair, Inc.

**Do You
Have an
Accident
Waiting to
Happen?**

**The
Lapeyre®
Stair is
Safer!**

Available in carbon steel, stainless steel or aluminum. Lapeyre® stairs are custom-built to specific height requirements for safety and space savings. The alternative where safety is important and space is tight. Lapeyre® stairs replace standard vertical ladders and ship's ladders. Applications include crossovers, catwalks, loading docks, rooftops and machine accesses. Safety features are highlighted by close-fitting handrails and a cushioned central stringer. Sturdy mobile stairs are available in 3 foot through 8 foot heights.

Fax 719-570-1176

DIAMOND WIRE SAWS CUT ANY MATERIAL!

NO

- ◆ Heat
- ◆ Surface Cracking
- ◆ Burrs
- ◆ Breakout
- ◆ Hairline Cracks

YES

- ◆ Cut Widths as small as .005"
- ◆ Minimal Kerf Loss
- ◆ Cut Composites Without Burrs
- ◆ Cut Ceramic without Surface Cracking

WE SOLVE CUTTING PROBLEMS
Ceramics, Silicon, Crystals, Substrates, Glass
Precious Metals, Standard & Custom Saws
Call for a Sample Cut Analysis

QUALITY PRODUCTS & SERVICE
SINCE 1989

SILICON & GERANIUM OPTICAL MATERIALS

At Lattice, we set the standard for service, quality, and workmanship
with our prompt turnaround on quotes, short lead times, flexibility
and effective problem solving.

Crystal Growth • Testing • Shaping • Slicing • Blanchard Grinding
State-of-the-Art CNC Milling • Curve Generation • Polishing

Fabrication capabilities include:

Squares	Disks	Rectangles	Rods
Trapezoid	Ellipses	Prisms	Generated Blanks

Many other custom shapes are also available

There can be only one...

Success by Design

Determining market needs, designing product to industry specifications, making the product affordable for the application and providing customer service and support are key ingredients to success in the test equipment area. Not an easy task, but one that LEADER is proud to have mastered.

Global vs Local Focus

As corporations grow product development tends to shift from local niche needs to satisfying global requirements. Products are made to fit a wider range of applications, but lack the specialization needed for local, niche markets. However, Leader's product development processes allow us to focus on a local-niche basis while optimizing the product line globally. With representation in 64 countries our product platform builds on global feedback with features or modifications that meet local niche needs. This means specialized products for your specific application, but at mass market pricing.

Product Line

Most of the instruments you will see in our catalog or on our Web pages were developed originally for clients that requested them, and were then adopted for general use. The key is—we build what the industry wants. Read through our features and you'll find the diversity you need. Call us and you will get a reasonable price, excellent customer service, and warranty plans that surpass expectations.

LEATHERWOOD PLASTICS

Manufacturing Wet Processing Equipment Since 1980
for the Semiconductor, Printed Circuit Board and Plating Industries

Wet Benches and Cleaning Stations

- Wet process stations, rinse or etch
- Quartz tube etchers
- Large or small parts cleaning benches
- Process controls and automation

Tanks and Plating Systems

- Manual or automated
- Heaters, controllers
- Hoists, agitation
- Work tables, sinks
- Pumps, filters
- Bus bars
- Racks, baskets
- Repair, modify

Clean Room Dry Boxes and Transport Carts

- Wet or dry pass-throughs, cabinets
- Quartzware transport carts
- Chemical transport carts
- Desiccators, nitrogen-purged cabinets

Waste Water Treatment Systems

- Large or small industrial applications
- Discharge compliance is guaranteed
- Cleaners, settling tanks
- Filter presses
- Sand filters
- Sludge dryers

Clean Room Storage Equipment

- Gowning room storage racks, shelves
- Chemical storage cabinets
- Quartzware, work-in-process storage
- Laminar flow equipment, work stations

Exhaust & Ventilation Systems

- Corrosion-resistant exhaust systems include:
- Duct and fittings
- Blowers and scrubbers
- Complete custom installations and repairs
- Exhaust hoods
- Mist eliminators

Count on Lechler

Count on Lechler to provide the highest-quality, precision engineered spray nozzles for your industrial application. Our dedication to your satisfaction means that you can count on Lechler when it comes to nozzles for your existing fluid applications systems and custom-engineered solutions including:

- Steel & Primary Metals Production
- Air Pollution Control
- Gas Conditioning
- Manufacturing Processes
- Chemical Processing
- Tank Cleaning • Food • Beverage
- Electronics • Pulp & Paper

Lebow® TRANSDUCERS

Lebow specializes in the measurement of torque and tensile and/or compression forces, with a wide selection of transducers available for fatigue, as well as general purpose applications. Lebow supplies force measurement transducers for test to a wide variety of industries.

Lebow stresses the applications oriented nature of proper transducer selection and maintains a staff of experienced Sales and R&D engineers for customer assistance and new product development. An extensive standard product line and a varied engineering file, based upon more than 40 years of experience, assures the proper selection of a transducer for a particular application. Lebow maintains an extensive computer controlled calibration facility with N.I.S.T traceability to 1,500,000 pound inch of torque and 600,000 pounds of force.

TURNKEY SOLUTIONS FOR HIGH TOLERANCE, GRINDING INTENSIVE PRO-

LEE'S GRINDING

DEDICATED TO QUALITY

Available equipment can handle a virtually unlimited quantity of parts. CNC OD, ID and Centerless grinders are uniquely capable of performing multiple operations to grind various diameters in a single operation. You get a more precise part with faster turnaround, less handling and at lower cost compared to grinding each diameter as a separate operation.

- Internal Grinding
- External Grinding
- Centerless Grinding
- Match Grinding
- Crush Form Grinding
- Honing
- Cylindrical Lapping
- Complex Form & Thread Grinding

LEESON

**your source for motors,
garmotors and drives**

STOCK MOTORS

Off-the-shelf delivery of nearly 4,000 ratings, sub-fractional through 500 HP. AC and DC. NEMA and IEC frames.

CUSTOM MOTORS

From a few at a time, up to thousands...all custom-engineered and manufactured to your requirements. Sub-fractional through NEMA 215T frames.

GEARMOTORS and GEAR REDUCERS

Right-angle and parallel shaft, AC and DC sub-fractional HP gearmotors. Worm gear reducers and Gear+Motor™ packages in fractional and integral HP ratings. Single and double reduction. Cast iron or aluminum housings available.

ADJUSTABLE SPEED DRIVES

AC inverters from sub-micro to 60 HP. SCR thyristor DC drives to 3 HP.

ELECTRIC MOTORS
GEARMOTORS and DRIVES

LENAPE

The Skill to Meet Every Forging Need.

For over 50 years, Lenape Forge has produced custom forgings. Our forgings have been used in virtually every major industry. Lenape's comprehensive 135,000 square foot plant can meet nearly every forging need.

Forging Methods:

- Contour Die
- Open Die
- Back Expansion
- Mandrel Expansion
- Closed Die
- Upsetting
- Piercing & Punching
- Plate Flueing Pressing

-- Maximum input weight is 21 tons --

-- Largest Press is 5,000 tons --
